

When Mother Nature Speaks

By
*Alicia
Eldridge*

When Mother Nature speaks,
believe that she'll be heard.
She has control of everything,
the seas, the lands, the birds.

She remembers when we cared for her.
When we treasured the beauty she gave.
All she wants is for us to see,
and hear what she has made.

When Mother Nature speaks to us,
she is trying to open our eyes.
Our soul is darkening each generation,
this 'Angel of Death is no surprise.

But from this darkness she'll spread our wings,
and teach us how to listen,
then life will blossom on every street,
our hearts and minds will glisten.

Remember that the world is ours.
It is all we have to share.
If we work together as people should,
we'll fix the pollution in the air.

You've seen what shutting the world down,
Can do in just a little time.
Imagine what a difference we can make,
when we work with her design.

With kindness, hope and love in our hearts,
We'll bring the world to Glory.
'Once upon a time' will be,
The beginning of our brand new story!
